

# HIGH VACUUM OIL PURIFIER

## VSD SERIES

◇ HIGH PERFORMANCE    ◇ SAFETY    ◇ USER-FRIENDLY

### ■ General

Sanmi High Vacuum Oil Purifier is designed to purify insulation oil. Through the process of dehydration, degassing and fine filtration process, the dissolved water, dissolved gases and particles can be removed completely to upgrade the properties of transformer insulating oil.

This compact unit allows you easy access for handling, checking and maintenance of both its oil system and exhaust system.

### ■ Features

1. Weather-proof metallic enclosure(thickness 2mm) with lock for outdoor use
2. Hot Oil Circulation model and switch for drying
3. LED illumination for night lighting
4. Protection Alarm and interlock indication
5. Free maintenance in vacuum chamber
6. Easy operation and maintenance
